

PRESS RELEASE

Bronkhorst extends ISO 17025 Calibration Services

Bronkhorst High-Tech B.V. manufactures a wide variety of Mass Flow and Pressure Meters and Controllers. As a standard, all instruments are factory calibrated using highly accurate calibration devices, traceable to international standards. Accredited calibrations may be required for various reasons, e.g. to meet specific demands from authorities, or for instruments that will be used as reference standards. As from 2010, Bronkhorst's Calibration Centre performs ISO/IEC 17025:2005 accredited calibrations for gas flow meters and controllers in the range of 0.7 ml_n/min up to 6,200 l_n/min. This scope of calibration services could recently be extended thanks to the development of an advanced calibration system for low liquid flow calibrations. With this system Bronkhorst can offer their Coriolis mass flow meters and controllers in flow ranges of 1 g/h up to 30 kg/h with ISO 17025 accredited calibration.
