

PRESS RELEASE

A Clear View on Higher Flow Rates

Mass Flow ONLINE B.V, the e-commerce channel of Bronkhorst High-Tech B.V., announced the release of two new models in their MASS-VIEW series: MV-108 mass flow meter and MV-308 mass flow regulator. With the introduction of the new models, the MASS-VIEW product line has been extended to gas flow rates up to 500 l_n/min (N₂-equivalent), fulfilling the demand from industrial users e.g. for gas supply in burner applications, chemical processes, and systems in the food & beverage industry. The instruments provide local display as well as an electronic output signal and feature an accuracy of $\pm 1\%$ RD plus $\pm 0.5\%$ FS up to 250 l_n/min and $\pm 2\%$ RD for higher flow rates. Both models have 4 pre-installed ranges (100%, 40%, 20% and 10% of maximum FS range) selectable via a user-friendly menu, using a 4-way navigation button. The user can easily select one out of the 10 pre-installed gases – Air, N₂, O₂, Ar, CO, CO₂, N₂O, CH₄, C₃H₈, C₄H₁₀ – which eliminates the need to recalibrate for different gases. The maximum operating pressure is to 10 bar(g) / 150 psi(g). MASS-VIEW instruments are available on stock and can be easily ordered via www.massflow-online.com.
